

(v.13)

Tyres with the same dimension but from different manufacturers or even models usually also have a different internal volume. So you can't say that e.g. a 90/90-21 mousse fits into a 90/90-21 tire.

This table lists all tyre-mousse combinations that have been tested by us. This guarantees which mousse is best suited to which tyre.

| Type Dimension | Extreme | Soft | Normal | Hard |
|--------------------------------|---------|-----------|--------|------|
| X-GRIP - TYRES | | | | |
| SuperENDURO-F 80/100-21 | | | EV-0 | |
